VERONICA'S CUP
KAMNIK | SLOVENIJA

POWERED BY:

I FEEL
SLOVENIA

2024 VERONICA'S CUP POWERED BY I FEEL SLOVENIA

Became Sustainable Sport Event

→ 2024 VERONICA'S CUP powered by I FEEL sLOVENia has become a green event. To this end, we have drawn up some guidelines to help us achieve our goals together. Please read the recommendations carefully and follow them throughout the event.

→ Let's work together for the planet and a better tomorrow!

8 Key areas

SUSTAINABLE MOBILITY

If you can, travel to the competition by land.

We have organised transfers for all of you staying in hotels booked through our reservation service. You will be informed in advance of the shuttle schedules. We are on foot within the competition venues. This helps to reduce CO₂ emissions.

PROTECTING THE ENVIRONMENT

Virtual notifications and map: a few days before arrival, competitors will receive a QR code in their on-site email addresses when they check in, which will take them to a website with all the key information about the event. This will avoid additional paper and plastic waste.

Separate waste collection: containers for separate waste collection (plastic, paper, glass) will be placed at the venue. Please dispose of your waste properly.

RRecycling and reuse: signs, banners are made for reusable use, so please handle our materials with care. Target stands are made of wood. In this way, we help to reduce more waste that would be generated by using disposable materials.

ENERGY EFFICIENCY

3 competition days and 2 days of unofficial training will be held in the Municipality of Kamnik, at the Friendship Mekinje stadium, where our club has a training hall and an outdoor shooting range. We have set up a self-sustaining solar power plant to generate electricity for training and competitions. We also supply the Veronica's Cup with this energy.

GREEN VENUE

Plants and Decorations: we use plants from the surrounding area and sustainably grown pot plants from local florists to decorate the venue.

Reduce Footprint: We limit the use of plastic materials and keep the surroundings clean.

Disabled-friendly event: we will make the event accessible and free of charge for people with reduced mobility. With prior registration, disabled persons will also be admitted to the finals, which will take place at the Volčji potok Arboretum.

FOOD AND DRINKS

Bottled tap water: competitors will receive bottles of tap water to drink when they arrive at the competition. Water balloons will be placed around the venue where you can fill your own bottles and help reduce plastic packaging. Kamnik has one of the best drinking water sources in the world.

Local, organic and seasonal food, and a choice of meat-free menu: the food at the event will be prepared by local caterers, we will provide a meat-free menu option, and we will aim for seasonal and organic food, and to minimise food waste.

Reducing food surplus: Excess food will not be thrown in the rubbish but will be distributed among the participants. We will also ensure efficient food ordering through careful planning and pre-registration for meals.

Reduce packaging waste: Use sustainable food packaging and conventional plates and cutlery at meals. We kindly ask you to minimise the use of plastic and disposable packaging at all steps.
